

Dear Parent/Carer,

The Science team at TEMA are committed to ensuring your child's success in their GCSEs.

I am writing to let you know that your child has been selected to have bespoke intervention in science to support them in accessing the revision materials that we have provided for them to facilitate their independent study.

Students will be receiving a revision guide to ensure they have access to the core information that they need for their Edexcel science course.

To help with revision we have also provided a booklet to them that was received either during parents evening or in class. This booklet has the following things to help keep students motivated and to encourage them to study independently:

- A link to the Edexcel specification in science
- A link to an online platform so that Edexcel core practical can be performed virtually
- A link to Oak Academy that has PowerPoints and videos of science lessons
- Revision timetable and example
- Revision checklists for all the topics on Paper 1 and Paper 2 with suggested activities to help structure revision for each unit
- Revision checklists for all the required practicals with Youtube links
- Revision checklist with all the powerful language and 6 mark exam questions that link to each topic.

Students will have received knowledge organisers in lessons and have an overview of effective revision strategies. Please encourage them to try these. Additionally, class teachers will be uploading revision material to Google classroom for students to supplement their independent study.

Students may also wish to use Seneca Learning, a free online revision tool that can be accessed here:

- <https://senecalearning.com>

If you have any questions, please do not hesitate to contact myself or your child's science teacher.

Yours sincerely,

V Lloyd

Head of Science
